What to Know About Low-Dose Naltrexone (LDN) and Ketamine: A Personalized Medicine Approach

Wednesday, April 21, 2021 | 6 pm PT

Pain-related conditions affect many patients, both in general and those with autoimmune diseases. Designed to help you expand your practice and better serve these patients, this **free, live webinar** will provide insight into:

- The therapeutic uses of ketamine and other non-opioid treatment options for pain
- The science, physiology and mechanisms of action of low-dose naltrexone (LDN)
- The many conditions LDN may be beneficial for, including: inflammatory conditions of the gut and skin, chronic pain, anxiety and more

A live Q&A session is included.

FEATURED PRESENTER

Sebastian Denison, RPh, FAARM (candidate) | PCCA Clinical Compounding Pharmacist

Sebastian received his Bachelor of Science in pharmacy at the University of British Columbia. He worked at Northmount Pharmacy in North Vancouver for 11 years, specializing in HRT, veterinary, pain and sports compounding. He also was the manager of Pharmacy Operations with the 2010 Vancouver Winter Olympic/Paralympic Games, and then the manager of the Whistler Olympic Village Polyclinic Pharmacy. In addition to his role as a PCCA clinical compounding pharmacist, Sebastian works with both the U.S. and Canadian CORE compounding training education teams and the pharmacy student education team. Sebastian also speaks at physician, pharmacist and other health care professional education symposiums and events. He has recently lectured for the American Academy of Anti-Aging Medicine on *Nutrition and Pain, Pharmacy Compounding and Collaborative Practice, and Alternative*

Uses for Naltrexone. Sebastian is currently completing the Metabolic Medical Institute's Fellowship in Metabolic & Nutritional Medicine Fellowship.
